

IN THE CLAIMS:

1. Motor housing (1), especially for window lift motors or sunroof motors, having at least one pole cover (2) and a housing (3) closing off the pole cover, which are joined using fasteners (4), characterized in that the pole cover (2) has several receptacles (5) for the fasteners (4), that the housing (3) closing off the pole cover has several counterreceptacles (6) for the fasteners (4), [and such that various receptacles (5) on the pole cover (2) for various housings (3) closing off the pole cover cooperate with the counterreceptacles] wherein the pole cover can be combined with different types of housings (3), wherein for combining the pole cover with the different types of housings (3), at least partially various receptacles (5, 12) on the pole cover (2) cooperate with corresponding counterreceptacles on the housing (3) by means of fasteners (4).

2. Motor housing (1) according to claim 1, characterized in that the pole cover (2) has at least one receptacle (5) more than the housing (3) closing off the pole cover has counterreceptacles (6).

**Claims as amended:**

1. Motor housing (1), especially for window lift motors or sunroof motors, having at least one pole cover (2) and a housing (3) closing off the pole cover, which are joined using fasteners (4), characterized in that the pole cover (2) has several receptacles (5) for the fasteners (4), that the housing (3) closing off the pole cover has several counterreceptacles (6) for the fasteners (4), wherein the pole cover can be combined with different types of housings (3), wherein for combining the pole cover with the different types of housings (3), at least partially various receptacles (5, 12) on the pole cover (2) cooperate with corresponding counterreceptacles on the housing (3) by means of fasteners (4).

2. Motor housing (1) according to claim 1, characterized in that the pole cover (2) has at least one receptacle (5) more than the housing (3) closing off the pole cover has counterreceptacles (6).
